To Aaron Rogers

I read about your contacting of Covid-19 in the Journal Sentinel this morning. I applaud your decision to think independently and do your own research on this subject.

I have enclosed a copy of the first printing of a book I wrote on Covid 19 and discuss within its pages my own early experience with Covid in Feb 2020. I also have done research on health and immunology for the past 30 years. I have attached a list of several other books I have written and published including one on Immune Restoration.

There are many low cost natural remedies for SARS-C0v-2 (Covid-19) discussed in this book including testimony given by Dr. Pierre Kory on the successful use of Ivermectin before Senator Ron Johnson's Committee in December of 2020.

Besides ivermectin, there is Artemisia Annuua (sweet wormwood), Thyme and Oregano as a source of thymol, grapefruit seed extract, bathing in water to which extra bleach has been added or hydrogen peroxide. There are many dietary and other nutritional and herbal remedies. Using an Oximeter tester to measure your oxygen levels is an important monitoring device. Two supplements that increase oxygen levels and inactivate the SARS-Cov-2 virus are listed in the book. Please share this book with your doctor and call me at 414-231-9817 if you have any questions.

Conrad LeBeau

Copies of my book on covid-19 are also being sent to -  
Senator Ron Johnson, Senator Rand Paul, and President Joe Biden
